What to write on the test forms

Print the forms, write on them by hand exactly as listed below, scan them, group the scans into dossiers and upload. Keep this document next to you. All names, numbers and data are made up.

1. Printing

- Print each form F01 to F15 on A4 paper, one side, one page each.
- In the print dialog choose ACTUAL SIZE (100%). NEVER choose Fit to page: the zones are sized for real size.
- Black and white is fine. Do not print the PREVIEW_ images, answer_key.md, questions.md or this document into the scan batch.

2. Pen and writing

- Use a black or dark blue ballpoint or gel pen. No pencil, no highlighter, no thick felt tip.
- Write naturally, at your normal speed and with your normal handwriting. Do not print neat capitals unless the table says so.
- Copy the text exactly: same digits, commas, dots, slashes, spaces and capital letters. Write inside the boxes, never over printed text or the grey Z labels.
- Arabic is written from right to left, as you normally write it. Arabic-Indic digits (for example 12/03/2026 written with Arabic digits) are given where needed.
- CORRECTION rows: write the first value, cross it out with ONE straight line (it must stay readable), then write the second value beside it. The second value is the true one.
- Margin note rows: write small, as a quick note. Signature rows: sign with your normal signature, no printed name. Checkbox rows: tick the one box named, with a normal tick.
- Rows marked Leave empty stay empty on purpose. If you make a mistake that is not a planned correction, start the page again.

3. Scanning

- Flatbed scanner: 300 dpi, grayscale or colour. Phone: use a scanner app, flat cropped result, even light, all four corners visible.
- One page per scan, or one multi-page TIFF or PDF. Keep the pages straight.

4. Naming and grouping into dossiers

A dossier ID looks like FIN-C92-S1-F0001: department (FIN or HR), -C and two digits, -S and one digit, -F and four digits. Make one folder per dossier, named with the ID, and put its scans in the order given here. Page order matters; each page starts its own document (the system cuts on the capital-letter title and the Ref line).

- FIN-C92-S1-F0001 (Purchasing cycle): F03 Purchase Order, F04 Goods Received Note, F12 Invoice Approval Sheet, F13 Cheque Request.
- FIN-C93-S1-F0001 (Cash and expenses): F02 Expense Claim, F05 Bank Deposit Slip, F06 Petty Cash Voucher.
- FIN-C94-S1-F0001 (Meeting and fleet): F08 Meeting Minutes, F11 Vehicle Maintenance Log.
- HR-C92-S1-F0001 (English HR forms): F01 Leave Request, F07 Weekly Timesheet, F09 Employee Information Update.
- HR-C93-S1-F0001 (Arabic and bilingual HR forms): F15 Leave Request, F14 Official Memorandum, F10 Visitor Log.

Example: folder FIN-C92-S1-F0001 holds scan_001.pdf (4 pages: F03, F04, F12, F13, in that order) or four single-page scans named 001, 002, 003, 004.

5. Upload

- Open the web app and sign in as Sara. Click Upload. Choose the Department (FIN or HR) of the dossier and keep Mode on By dossier.
- Type the dossier ID, choose the scan file or files, click Check files, then Confirm and upload.
- The local dev server cannot read real handwriting (its readers are fixtures). Real reading needs the Azure deployment.
- Never upload this document, answer_key.md, questions.md or the PREVIEW_ images.

F01 Leave Request (English, HR)

File: F01_leave_request.pdf (and F01_leave_request.png). Dossier: HR-C92-S1-F0001. Printed Ref: HR/LV/2026/0417. Purpose: Employee asks for annual leave; the manager decides in the lower box.

Zone	Where on the page	Write exactly	Language	Note
